WORK EXPERIENCE

Near Partner - Outsystems Developer

Near Partner | January 2023 - Current

- Contributed to an internal application aimed at introducing new features and enhancing existing ones.
- Mentored and guided a junior colleague, facilitating their growth in Outsystems expertise.
- Diverse responsibilities including user story creation, hands-on development, knowledge transfer, and rigorous code reviews.

Fortune Brands | July 2022 – December 2022

- Contributed to a project organized into two teams: a dedicated backend team responsible for designing REST APIs, and a frontend team responsible for designing informative screens.
- Held a pivotal role as a member of the frontend team, collaborating to transform data from the APIs into user-friendly screens and interfaces.

Western Union | September 2021 – May 2022

- Development of a mobile application designed to efficiently manage bank accounts, facilitate money transfers, enable currency conversion, and establish financial goals.

Noesis - Outsystems Developer

Noesis | March 2020 – August 2021

- Gained proficiency in Outsystems by actively participating in an internal academy during my tenure at Noesis.
- Contributed substantially to the development of an internal application, showcasing collaborative design and implementation skills.
- Functioned as a pivotal backend team member, with a primary goal of establishing REST APIs for frontend teams' utilization.
- Engaged directly with clients, addressing needs by developing new features and resolving existing bugs systematically where I was the sole developer.

Noesis – DevOps Automation

NOS | August 2018 – March 2020

- Executed comprehensive API automated tests, including script development.
- Developed scripts to automate client-specified tasks, streamlining operations.
- Conducted performance testing on client applications, optimizing user experience.
